LUTHERAN LIFE COMMUNITIES BRINGS HIGH-TECH TO ASSISTED LIVING

September 20, 2021 – Lutheran Life Communities announced today the addition of Caspar.AI technology to 45 of its Hearthstone Assisted Living apartments at Lutheran Home in Arlington Heights, IL and Wittenberg Village in Crown Point, IN. Caspar, AI, a Redwood City, California high-tech firm, brings patented, human-centered technology to the senior living community setting.

“Lutheran Life Communities is excited to bring the Caspar.AI system to our Hearthstone communities at Lutheran Home and Wittenberg Village” said Sloan Bentley, CEO. “We see this as an opportunity to enhance communication for residents and families. “Families will have a new level of peace of mind and connection, even when they can’t be there.”

In addition to voice command convenience for residents, the Caspar.AI system will provide Hearthstone residents with:

- Daily wellness and sleep quality reports
- Voice command to call team members for assistance if needed.
- Daily communication to family members through the Circle of Care feature

Said Joe Anderson, Vice President of Sales for Caspar, AI: “Our focus at Caspar is to make life easier for residents in assisted living apartments. We also provide team members with daily data reports to enhance their resident programming. There is also a feature which allows family members of residents to connect through their own smart device to check on a resident’s health – We call that feature ‘How’s Mom?’

Lutheran Home and Wittenberg Village are owned and operated by Lutheran Life Communities of Arlington Heights, Illinois.
