Re: PPE Burn Rate Calculator

Hospitals, local health departments, EMS, and many other healthcare partners have been impacted by the shortage of PPE during the COVID-19 pandemic. It is important that all healthcare partners know there is a tool available to estimate their PPE availability.

The link below will take you to a spreadsheet that allows for entry and will create an estimate of when an organization or healthcare partner will reach critical levels of PPE.

The [personal protective equipment \(PPE\) burn rate calculator excel icon\[XLS – 39 KB\]](#) is a spreadsheet-based model that provides information for healthcare facilities to plan and optimize the use of PPE for response to coronavirus disease 2019 (COVID-19).

Thank you!
