Reporting Results of Point of Care Testing for COVID-19: A New National Healthcare Safety Network Tool for Long-term Care Facilities

Katherine Allen-Bridson RN, BSN, MScPH, CIC Nurse Consultant

NHSN Training

October 30, 2020

cdc.gov/coronavirus

Agenda

- Overview
 - Coronavirus Aid, Relief, and Economic Security (CARES) Act
 - Data Sharing Through National Healthcare Safety Network
- Data Entry
- Analytics
- Demonstration
- Question and Answer

Please submit any questions via the Q & A box ONLY. Questions submitted to Chat will not be monitored for questions. As time allows, a live Q & A session will follow the presentation.

Forms and Tables of Instructions

https://www.cdc.gov/nhsn

What is Point of Care Testing?

- The College of American Pathologists (CAP) defines POCT as "testing that is performed near or at the site of a patient with the result leading to a possible change in the care of the patient."¹
- It is usually performed by non-laboratory trained individuals such as nurses, physicians, nursing assistants, and anesthesia assistants
- These tests generally offer faster turn-around time for results
- They often require less sample volume than tests performed in the laboratory

¹https://webapps.cap.org/apps/docs/education/OnlineCourseContent/2011/LAP/Resourc es/Checklists/POC.pdf#:~:text=DEFINITION%20OF%20POINT-OF-

Overview

Impetus and Process

. .

Coronavirus Aid, Relief, and Economic Security (CARES) Act

Public Law 116-136, § 18115(a)¹

- Requires reporting
 - within 24 hours of results
 - results of each test to "detect SARS-CoV-2 or to diagnosis a possible case of COVID-19" by laboratories*
 - to Secretary of Department of Health and Human Services(DHHS)
- DHHS issued guidance on June 4, 2020 to outline requirements for data submission to DHHS as authorized under the CARES Act²

²https://www.hhs.gov/sites/default/files/covid-19-laboratory-data-reporting-guidance.pdf

HHS Guidance on CARES Act Reporting

The required data elements related to Laboratory Data Reporting to HHS may be reported through the following avenues:

- 1. Submission of laboratory testing data directly to state and/or local public health departments, as required by state and/or local law or policy. These entities will then submit de-identified data to the CDC on a daily basis using either Health Level 7 (HL7) messaging or the CDC-provided CSV format.
- 2. Submission of laboratory testing data to state and local public health departments through a centralized platform (such as the Association of Public Health Laboratories' AIMS platform) where such data will then be routed to the appropriate state and local authorities and routed to CDC after removal of elements to achieve de-identification according to applicable rules and regulations.

https://www.hhs.gov/sites/default/files/covid-19-laboratory-data-reporting-guidance.pdf

HHS Guidance on CARES Act Reporting Cont.

The required data elements related to Laboratory Data Reporting to HHS may be reported through the following avenues:

- 3. Submission of laboratory testing data through a state or regional Health Information Exchange (HIE) to the appropriate state or local public health department and to the CDC as directed by the state.
- 4. CMS-certified long-term care facilities shall submit point-of-care SARS-CoV-2 testing data, including antigen testing data, to CDC's National Healthcare Safety Network (NHSN). This requirement to submit data to CDC's NHSN applies only to CMS-certified long-term care facilities. Test data submitted to NHSN will be reported to appropriate state and local health departments using standard electronic laboratory messages. Other types of LTC facilities may voluntarily report testing data in NHSN for self-tracking or to fulfill state or local reporting requirements, if any.

https://www.hhs.gov/sites/default/files/covid-19-laboratory-data-reporting-guidance.pdf

Why a Reporting Option Through NHSN?

• Creates a single, standardized reporting system that:

1) all ~15,400 nursing homes already use for other COVID-19 reporting;

2) has the capability to share data with state and local health departments;

3) has the capability to share data with HHS and CMS; and

4) avoids the creation of a patchwork of different jurisdictional reporting systems by state health departments

If your state or local health department has already developed a process by which facilities report these data, please contact these public health authorities before changing the reporting process.

Nursing Home POC Test Results Reporting Data Flow

Data Entry

. .

Inclusion of Personally Identifiable Information (PII)

- PII is an integral component of contact tracing and prevention measures at the state and local level
 Reporting is only available to
- PII data is secured and encrypted for protection
- POC Testing option therefore collects PII
 - Name (Last name, First name, Middle Initial)
 - Street address
 - Phone number with area code
 - Date of birth
 - Ordering provider address
 - Ordering provider phone number
- NHSN Groups, which are agencies or organizations which a facility has conferred rights to so they may see or access the facility's NHSN data will not be provided access to test results for facility staff members.

Reporting is only available to those with Level 3 security access with Secure Access Management Services (i.e. SAMS-Level 3). This requires a grid card. If you do not have one, please send an email to NHSN@cdc.gov with subject: Enhancing Data Security.

In Recognition of Confidentiality Requirements

 Only NHSN Facility Administrator (FacAd) will automatically be granted rights to <u>STAFF</u> POC data.

 FacAd will need to grant rights to other NHSN Users as needed to perform necessary reporting.

> Let's look at how one grants NHSN rights to an NHSN User

Burden-sparing NHSN Architecture

- "Single-page application"
- Required data elements limited to those identified in CARES Act and/or needed by state and local health departments
- Drop down list for county based on State
- Options are specific for the test device used
 - Test ordered
 - Specimen source
 - Test result

Burden-sparing NHSN Architecture Cont.

- Auto-population for some data fields
 - Links to previously entered demographics for the tested individual
 - Defaults to facility address for residents
 - Defaults to identified information for
 - Testing device
 - Test Ordered
 - Ordering physician
 - Specimen number
 - Symptomatic?
 - Pregnant?

What happens if the device my facility is using is not listed?

- Report those results as you have been doing previously
- NHSN is continuously updating the list of test devices for which test results can be reported

Analytics

. .

Analysis

- Two current line list options
 - Resident testing
 - Staff/Volunteer/Contractor testing
- Run and Modify options
- Sortable- default is sort by test result
- Additional analysis options to be added as needs identified
- Always remember to generate datasets before running analysis to ensure that all entered data is included.

Summary

. .

- NHSN's Point of Care Test Reporting Tool for COVID-19 has been identified by the Department of Health and Human Services as the method by which the data should be reported
- The tool enables facilities to report data which is then shared with state health departments (SHDs) and also with the CDC and U.S. DHHS
- For the few SHDs which have already implemented reporting pathways for this data, NHSN is working with the SHDs to identify messaging
- Data entry into the system has been built to be minimally burdensome; future enhancements are expected
- For questions about the system, please email: <u>NHSN@cdc.gov</u> and include in the subject line: POC Test Reporting Tool

Question and Answer
