

**POST TEST FOR BASELINE CARE PLAN**

Question: True or False?	Answer
1. The facility must complete a baseline care plan within 72 hours of admission.	
2. The resident and resident representative must be involved in the development of the baseline care plan.	
3. The resident and resident representative only need to be verbally informed of the summary of the baseline care plan.	
4. Any changes in the resident condition must be reflected in the baseline care plan.	
5. The information from the hospital is not necessary when completing the baseline care plan because the resident is not in the hospital any longer.
