POST TEST ANSWER KEY - RESIDENT MOOD AND BEHAVIOR

Question: True or False?	Answer
1. Behavioral health encompasses a resident's whole emotional and mental well-being that even may include the prevention and treatment of mental and substance use disorders.	True
2. When a resident presents as tearful, this is what is known as a delusion.	False – a Delusion is a fixed, false belief not shared by others that the resident holds even in the face of evidence to the contrary. (<i>CMS MDS 3.0 RAI Manual</i>).
3. The PHQ-9© is a new medication to treat behaviors.	False - Patient Health Questionnaire for D0200 (Resident Mood Interview) is a validated interview that screens for symptoms of depression with a standardized severity score and rating, for the MDS 3.0 to screen for the presence or absence of specific clinical mood indicators in order to provide a rating for evidence of a depressive disorder.
4. Documentation of resident behaviors and effectiveness of approaches is required.	True – documentation is required to ensure adequate resident information on mood and behaviors is in the medical record .
5. If the behavior documentation is incomplete, the pharmacy consultant may give recommendations to physicians for medication changes that are based on inadequate information and could result in poor resident outcomes.	True – the pharmacy consultant uses the documentation as part of the medical record review when determining recommendations for changes/reductions of medication.
