

Report on Pending LTC Eligibility Crisis

Weekly reporting on Transaction Audit Numbers (“TANs”) HFS is making a strong effort to addressing issues beyond the current crisis by improving transparency. HFS deserves credit. HFS is posting a report of Transaction Authorization Numbers (“TANs”) with current status codes to give a detail level understanding of issues. More transparency is a step in the right direction.

This report includes data through the week of August 30, 2021. There is a one-week lag in data, so this data represents actions through August 27, 2021. An individual TAN may include an application for Medicaid eligibility in addition to the request to approve an LTC admission. The weekly TAN report does not identify which TANs have pending application, but all at least represent a pending LTC admission. The weekly update here will focus only on admissions because of this while any update to the monthly report will include pending applications.

Nine pending admissions over 45 days old.

I continue to strongly urged you to read both the HFS and DHS postings on the new policy at these links. [Link to Provider Notice](#) & [Link to DHS Policy Manual](#)

HFS has been systematically applying the new policy and approving admissions (status 17) over the last several weeks. However, some TANs are unable to be auto processed by the new programing because of errors with the TAN. Below are three of the top reasons why many of the remaining pending admissions cannot auto load.

- **Incorrect SSN or Recipient Id** – SSN and secondarily recipient id are the data key linking applications, eligibility, and admission data. If this is wrong, the TAN must be manually researched.
- **Multiple TANs entered for the same admission** – The auto processing program kicks these TANs out for manually processing. In some cases, HFS is seeing TANs for admissions that are approved and active on the system. Also, multi-site providers who centrally enter data are not using the correct provider id which again requires manual processing.
- **Providers not entering discharges onto MEDI** – This is a significant problem for SLs. New admits cannot load on top of an open ended one. Again, more manual intervention.

Provisional Eligibility & Age of TANs

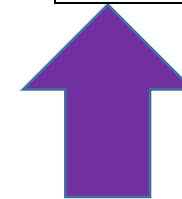

Without adjusting for duplicate TANs that are denied, over 80% of the TANs granted provisional eligibility are approved. This number is likely understated because we are now seeing TANs which were rejected now be approved. Rejected TANs do NOT show up in the pending numbers.

Numbers of residents given Provisional Eligibility (PE)	27,027
Number of residents currently with PE	-
Number of resident who have moved out of PE	27,027
Number moved from PE back to pending	-
Residents with decisions made	27,027
Completed & Approved	21,963
Completed & approved awaiting spenddown	7
Approved %	81%
Rejected / Denied	5,057
Some of these are denied because there are duplicates	

Rejected TANs APPROVED August 30th Data File
